

PRECISION CAMPUS TUTORIALS

HOW TO USE HINTS

1) 'Hints' are available throughout Precision Campus to help you if you find yourself stuck. Simply hover your cursor over a button and Precision Campus will reveal a useful 'Hint'.

2) For example, if you hover your cursor over the 'Clear all filters and settings' button, a speech bubble will appear with a hint letting you know what the button does.

3) The same applies when you are exploring different areas of Precision Campus, such as enrollments. If you hover your cursor over a button in the menu Precision Campus will reveal a hint to let you know what the button does.

The screenshot shows the Precision Campus interface with the 'Explore Enrollments' view. The left sidebar contains a 'FILTER' section with a red arrow pointing to the 'Add to chart' button. A tooltip is visible over this button, stating 'Click here to see more filter variables'. The main content area displays a bar chart titled 'Enrollment' showing enrollment counts for four consecutive fall semesters (2013 Fall, 2014 Fall, 2015 Fall, 2016 Fall). Below the chart is a table of enrollment counts for each semester.

2013 Fall	2014 Fall	2015 Fall	2016 Fall
3,175	3,287	3,203	3,280

This is an example footnote. It will show up at the bottom.
